

July 30, 2020

The Honorable Alex Azar
Secretary
U.S. Department of Health & Human Services
200 Independence Ave, SW
Washington, DC 20201

Dear Secretary Azar:

We, the undersigned organizations, thank you for renewing the public health emergency (PHE) declaration as a result of the COVID-19 pandemic for another 90 days. Together we represent millions of individuals working to address the unprecedented challenges the pandemic has presented to our society, our healthcare system, and our economy.

As you know, this renewal means that the federal government can continue to deploy all resources and authorities necessary to protect the public and assist states and localities as they continue to respond to this urgent situation. We cannot afford to ease up on our response to this grave threat as the number of SARS-CoV-2 infections continues to rise at an alarming rate across the country. By maintaining the PHE status, we can facilitate coordination and collaboration across and amongst federal agencies and with state and local authorities, increase the pace of research on SARS-CoV-2, accelerate development and approval of medical countermeasures and novel diagnostics, and ensure that individuals, particularly those who are in the most vulnerable communities, have access to myriad necessary health care and other social services.

We remain committed to working with you, the Administration, and Congress to meet the continued needs of the American public and move our nation through and beyond this pandemic. Please contact Allen Segal, the American Society for Microbiology's Director of Policy and Advocacy, at asegal@asmusa.org with any questions.

Sincerely,
